

HONGKONG LAND BANGKOK OFFICE

BANGKOK, THAILAND

AIM OF PROJECT

Located on the 20th floor of Bangkok's prestigious Gaysorn Tower, this new and bespoke office space overlooks the city's famous CentralWorld shopping complex. It provides a distinctive address in the city for this leading international property investment, management and development group.

The design for the space combines elegance and simplicity, using clean lines, symmetry and geometric shapes to bring a minimalist touch. The calm colour palette incorporates natural materials and textures.

The full-height glazing uses gradient patterns which allow

natural light to penetrate to all areas, enhancing the wellbeing of occupants and to help create a more relaxed working atmosphere.

BESPOKE OFFICE SPACE IN CENTRAL BANGKOK FOR A LEADING INTERNATIONAL PROPERTY COMPANY.

HONGKONG LAND BANGKOK OFFICE

BANGKOK, THAILAND

The use of partitions has been reduced to the minimum to provide transparency across the office and to encourage movement and collaboration. The pantry area is seamlessly integrated as an office social bar, with a white marble cube island framing the space and high chairs encouraging informal gatherings. The additional headroom available on the 20th floor also allows the use of oversized full-height monumental doors, creating a distinctive focal point in the office.

A planted green wall is integrated into the outdoor terrace, providing a connection with nature and complementing the stunning views over the Thai capital.
